SUMMARY

BS Software Engineering graduate and Full Stack MERN Developer with hands-on experience building responsive web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in designing RESTful APIs, implementing JWT authentication and CRUD operations, integrating AI APIs (Google Gemini), and deploying full-stack applications on cloud platforms. Seeking an entry-level Software Engineer / MERN Developer role within an agile development team.

SKILLS

Languages & Core: HTML5, CSS3, JavaScript (ES6+)

Frameworks & Libraries: React.js, Bootstrap, Tailwind CSS, Vite, React Router

Backend & Database: Node.js, Express.js, REST API Design, JWT Authentication, MongoDB, AI API Integration (Gemini), Prompt Engineering

Tools & Practices: Git, GitHub, Postman, Context API, Chrome DevTools, VS Code, Vercel, Serverless Deployment, Railway, Suga, UI/UX Basics

TECHNICAL EXPERIENCE

Frontend Web Development Intern — CodeAlpha (Remote) *May 2026 – Jun 2026*

- Developed and deployed a suite of responsive web applications using modern JavaScript (ES6+), keeping layouts consistent across breakpoints with CSS Grid and Flexbox.
- Built dynamic DOM manipulation logic to handle user input in an interactive calculator application.
- Implemented filtering logic and event handlers for smooth, responsive UI transitions.

PROJECTS

Job Application Tracker — Full-Stack MERN Application Live Demo | Code

- Built a full-stack job tracker with React (Vite), Tailwind CSS, Node.js, Express.js, and MongoDB (Mongoose), deployed on Vercel with a cloud-hosted backend.
- Implemented JWT authentication with bcrypt password hashing and protected routes, so each user can access only their own data.
- Developed a REST API with full CRUD, company search, status filtering, dashboard stats, and follow-up reminders.
- Added an AI-powered cover letter generator that drafts a cover letter from a pasted job description.

AI Mock Interview Coach — Full-Stack AI Application Live Demo | Code

- Built a full-stack mock interview app with React (Vite), Tailwind CSS, Node.js, and Express that generates role- and difficulty-based questions using the Google Gemini API.
- Implemented instant AI feedback per answer (score out of 10, strengths, improvements, sample answer) and an end-of-session summary with weak topics and next steps.
- Secured the API with input validation, rate limiting, and prompt-injection-aware prompts; validated structured JSON from the LLM; deployed frontend and backend as separate serverless projects on Vercel.

MERN Contact Book — Full-Stack MERN Application Live Demo | Code

- Built a full-stack contact management app on the MERN stack with a custom RESTful API for managing contact data.
- Deployed the Express backend on Suga with MongoDB integration and the React frontend on Vercel for a live environment.

LUMÉ — Fashion E-Commerce Store (React.js) Live Demo | Code

- Built a fashion retail storefront using React.js, Vite, and Tailwind CSS with a luxury minimalist design.
- Managed global state with React Context API for the shopping cart, wishlist, and multi-tier category filtering.

SkyCast — Weather Forecasting App (React.js) Live Demo | Code

- Developed a real-time weather app using live data from the Open-Meteo API, with geolocation-based search.
- Built a component-based, fully mobile-responsive UI with custom SVG weather icons.

Quran Ayat Search App — React.js Live Demo | Code

- Built a React app to browse all 114 Surahs and search Ayats, showing Arabic text with Urdu translation via the AlQuran Cloud API.

EDUCATION

BS Software Engineering — The Islamia University of Bahawalpur *2022 – 2026*

LANGUAGES

Urdu (Native) • English (Intermediate)
